I chose this phone because the adverts said it performed 1 well as its more expensive competitors. For the price, it is **pretty** good value for money. 2 **practical strong** packaging the phone came in also included a screen protector and cover, 3 saved me having to buy them. The **extremely attractive silver** phone has a **large clear** screen, making it very easy 4 use. It's not quite as fast as some major competitors, but it offers a **fairly good** performance. I was impressed 5 the **long-lasting lightweight** battery and, although other reviewers said the battery stopped charging after a month, mine charges perfectly.

The main downside 6 the **new** fingerprint ID system, which doesn't always work first time. Another problem is the camera, which sometimes freezes, so I have to turn the phone 7 and on to get it to work. However, the picture quality is great.

8 you want a phone to rival the more expensive brands, I recommend the GKKFONE 2.
