

Science Study

Name: _____

1. Support the body
 - a. Bones
 - b. skeletal system
 - c. legs.
2. Bones does the adult has?
 - a. 232
 - b. 206
 - c. 100
3. Names 3 bones
 - a. Skull, femur, ribs
 - b. school, feather, birds
 - c. skull, femur, ribs
4. Inhale oxygen, exhale carbon Dioxide?
 - a. Function of the circulatory system
 - b. Function of the respiratory system
5. Parts of the respiratory system?
 - a. Nose, hand, ear, hear
 - b. body, hand, face,
 - c. nose, mouth trachea, lungs
6. Consist of the organs and fluid that carry materials though the body
 - a. Respiratory body
 - b. circulatory system
 - c. circulatory nose
7. Name the organs of the circulatory system.
 - a. Head, shoulders, nice
 - b. hair, hand ear.
 - C. heart d, blood, (blood versets)
8. Digestion of food, digestion involves the breakdown of food into smaller pieces.
 - a. a. function of the digestive system
 - b. function of the face.
9. Organs of the digestive system?
 - a. Body, nose, ears , small intestine
 - b. ears, nose, body, large intestine
 - c. mouth, Esophagus, stomach, small intestine, large intestine
10. Consist of organs that remove meta bole wastes and toxins from the body.
 - a. Function of the excretory system
 - b. function of the head
11. Organs of the excretory system.
 - a. Music, cats, birds,
 - b. kidney, ureters, kidneys, urethra, bladder,
 - c. kidney, boys, girls

2. Write the correct answers

1. Organs of the excretory system.

2. Name the Organs of the digestive system?

3. Name the organs of the circulatory system

4. what is the Function of the circulatory system .

--	--

5. Parts of the respiratory system?

6. Names the three bones

--	--	--

7. _____ consist for organs that remove metabolic wastes and toxins from the body.

8. _____ Digestion of food. Digestion involves the breakdown of food into smaller pieces.

9. _____ Consist of the organs and fluid that carry materials though the body

10. _____ Function of the circulatory system .

11. _____ how many bones does the adult body has

12. _____ Skeleton system function.

3, Match the correct answer

What is the function of the digestive system	mouth, Esophagus, stomach, small intestine, large intestine
Consist of organs that remove meta bole wastes and toxins from the body.	Inhale oxygen, and exhale carbon dioxide
Name the organs of the excretory system	Hearth , blood, (blood vessel)
Name the organs of the digestive system?	Has 206 bones
What is skeletal system function	What is the circulatory system
Name the organs of the circulatory system	kidney, ureters, kidneys, urethra, bladder
Consist of the organs and fluid that carry materials though the body	Skull (protect the brain) Femur (largest bone) Ribs (protect the organs
Parts of the respiratory system	Nose mouth trachea lungs
What is the function of the respiratory system	Digestion of food. Digestion involves the breakdown of food into smaller pieces.
Name 3 bones	Support the body
How many bones does the adult body has	Excretory system

SCIENCE STUDIE GUIDE

Name: _____

1. What is skeletal system function?

A- Support the body

2. How many bones does the adult body has?

Has 206 bones

3. Name 3 bones

a. Skull (protect the brain)

b. Femur (largest bone)

c. Ribs (protect the organs

4. What is the function of the respiratory system?

a. Inhale oxygen, and exhale carbon dioxide

5. Parts of the respiratory system?

a. Nose mouth trachea lungs

6. What is the circulatory system

Consist of the organs and fluid that carry materials though the body

7. Name the organs of the circulatory system?

a. Hearth , blood, (blood vessel)

8. What is the function of the digestive system?

Digestion of food. Digestion involves the breakdown of food into smaller pieces.

9. Name the organs of the digestive system?

mouth, Esophagus, stomach, small intestine, large intestine

10. What is the function of the excretory system?

Consist of organs that remove meta bole wastes and toxins from the body.

11. Name the organs of the excretory system?

a. kidney, ureters, kidneys, urethra, bladder
