

## LESSON 4. RENEWABLE AND NONRENEWABLE RESOURCES

### 1. ALL NATURAL RESOURCES ARE RENEWABLE?

Renewable resources are those that can be replaced by a natural process given enough time. For example, soil, water, forest, plants, and animals are all renewable as long as they are used wisely and given the time needed to be re-created, regrown, or reused again.

Look at the pictures. Circle the natural resources.

wind

tractor

plants

plastic

toy car

soil

rocks

coal

umbrella

computer

cake

water

flashlight

oil

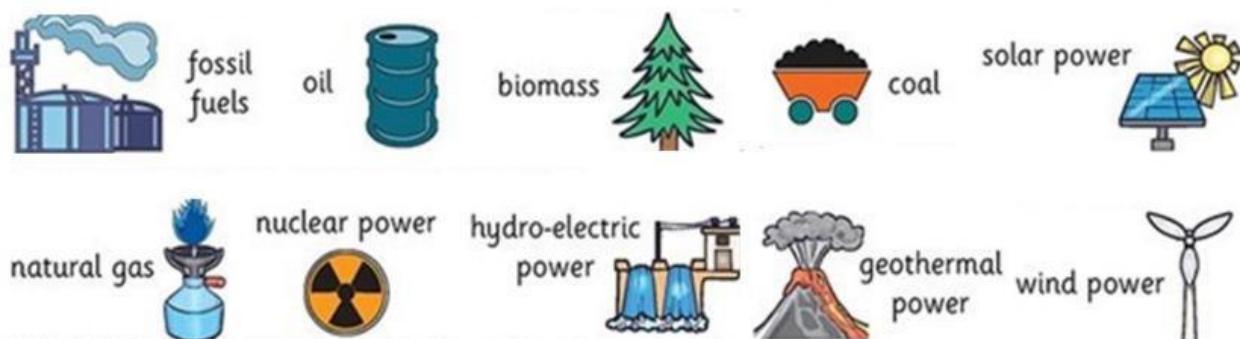

animals

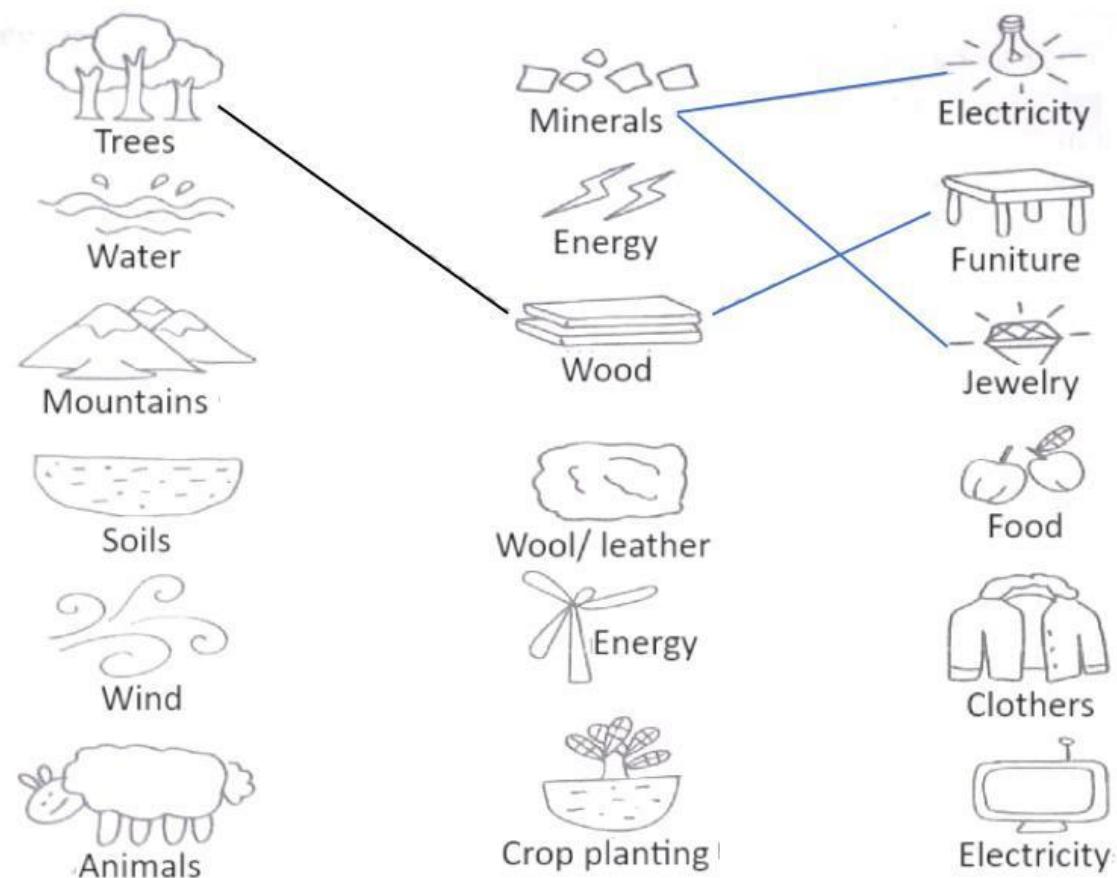

coat

### 2. CLASSIFICATION OF NATURAL RESOURCES.

Renewable Resources	Nonrenewable Resources

**3. CONNECT THE NATURAL RESOURCES ON THE LEFT TO THEIR PRODUCTS ON THE SUCCEEDING TWO COLUMNS**

**4. WORDSEARCH.**

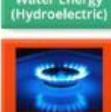

I	P	M	C	W	I	N	D	W	B
W	D	T	D	O	F	U	W	O	B
