

**1. Намерете сборовете:**

$$\begin{array}{llll} 26 + 6 = & 69 + 4 = & 36 + 36 = & 58 + 18 = \\ 58 + 7 = & 77 + 9 = & 48 + 13 = & 67 + 29 = \end{array}$$

**2. Пресметнете разликите. Направете проверка.**

$$\begin{array}{llll} 32 - 4 = & 58 - 9 = & 94 - 7 = & \begin{array}{r} 80 \\ - 34 \end{array} \quad \begin{array}{r} 100 \\ - 76 \end{array} \\ 41 - 6 = & 83 - 5 = & 86 - 8 = & \end{array}$$

$$\begin{array}{r} 72 \\ - 9 \end{array} \quad \begin{array}{r} 53 \\ - 18 \end{array} \quad \begin{array}{r} 85 \\ - 76 \end{array} \quad \begin{array}{r} 90 \\ - 33 \end{array} \quad \begin{array}{r} 41 \\ - 7 \end{array} \quad \begin{array}{r} 100 \\ - 27 \end{array}$$

**3. Пресметнете:**

$$\begin{array}{ll} 61 - (18 + 7) = & 100 - (16 + 73) = \\ 46 - (52 - 43) = & 100 - (100 - 92) = \\ 33 + (90 - 58) = & 97 + (81 - 79) = \\ (52 + 9) - 3 = & 35 + (37 - 17) = \\ 16 + (90 - 81) = & 71 - (18 + 14) = \\ 100 + (100 - 100) = & 0 + (100 - 64) = \end{array}$$

**4. Пресметнете по най-лесния начин:**

$$\begin{array}{ll} 43 + 8 + 17 = & 31 + 26 + 19 = \\ 68 + 18 + 12 = & 52 + 16 + 4 = \\ 27 + 64 + 3 = & 44 + 26 + 6 = \\ 59 + 1 + 21 = & 36 + 36 + 14 = \end{array}$$
