Data collection tools

1. What is the primary advantage of using questionnaires in research?

a) It allows for gathering large amounts of data quickly

b) It provides opportunities for clarification and probing

c) It minimizes bias introduced by the researcher

d) It enables researchers to control variables in a controlled environment

2. What is the primary advantage of using interviews as a data collection tool?

a) It allows for gathering large amounts of data quickly

b) It provides opportunities for clarification and probing

c) It minimizes bias introduced by the researcher

d) It enables researchers to control variables in a controlled environment

3. Which data collection tool involves systematically watching and recording behaviours or events?

a) Surveys

b) Interviews

c) Observations

d) Experiments

4. What is the primary advantage of using observations as a data collection tool?

a) It allows for gathering large amounts of data quickly

b) It provides opportunities for clarification and probing

c) It minimizes bias introduced by the researcher

d) It enables researchers to observe behavior in natural settings

5. Which data collection tool is best suited for gathering in-depth insights and opinions from a small group of participants?

a) Questionnaires

b) Interviews

c) Surveys

d) Observations
