— The Motor Car —

- 1 Many of the developments of the 20th century have changed the way
- 2 we live enormously, but a few of them have had the impact of the
- 3 motor car. In the most parts of today's world, it is very difficult for
- 4 most of people to imagine life without it – getting to work, going on
- 5 holiday, visiting family and friends would not be possible for a lot of
- 6 people. Some of families have more than one car. However, despite all
- 7 of the advantages the car gives us, it also has a several disadvantages.
- 8 In lots of cities there is so much congestion that none of the traffic
- 9 can move during the busiest periods. And much of the pollution that
- 10 affects many places is caused by the motor car. Many of people think that
- 11 motorists should give a little bit of thought to these problems and
- 12 make a little effort to resolve them, perhaps by using their cars less.
- 13 With a bit of co-operation, progress could be made, they say.

Roads

Ever since the invention of the wheel there has been a need for roads. In Britain, there were 1 no/any/none proper roads at all until the Romans built some 2,000 years ago. 2 Lot/Many/Much of Britain's roads developed naturally from footpaths. 3 Most/Most of/The most travel in the middle ages was only local and 4 all/all them/them all the roads at that time were links between neighbouring towns and villages, rather than planned routes across the country. There was 5 few/little/some progress

until 6 lots/many/several of 'turnpike roads' were built in the 18th century. Britain's modern road programme started in the 1950s – it didn't have 7 any/no/none motorways until then. The idea was to build a network of efficient motorways to connect the major cities. A 8 few/little/several of these motorways were built but lack of money and local opposition meant only about half a satisfactory system was developed. Today, there is disagreement about whether it is a good idea to build more roads.

~ Shakespeare ~

- 1 Among all of writers in history, Shakespeare is perhaps the most
- 2 well-known. Many of the plays he wrote are still performed regularly
- 3 in many of countries in the world. Over the years there has been a
- 4 lot of disagreement among scholars and experts about the meanings
- 5 of Shakespeare's plays; some of the books about him even suggest
- 6 that he didn't really write all the plays that have his name. There has
- 7 been a lot of research into his life and work but few of the theories
- 8 about him can be proved. A few people have even said that Shakespeare
- 9 was really a woman but there is little of support for this theory!
- 10 Many visitors go to Shakespeare's birthplace in Stratford in England
- 11 and a lot of them go to see a play at the Royal Shakespeare Theatre there.
- 12 A few of tourists find it difficult to understand the play because the
- 13 language is old. Because they don't understand much it they either
- 14 leave after a short time or are asleep all the evening! However,
- 15 with a little of effort it is possible to enjoy the plays even if you don't
- 16 have much of knowledge about them. The productions are always
- 17 entertaining and few of people have difficulty in following what is happening.
