

Strand E (test)

Choose the most appropriate response.

1. The sum of all probabilities equal to:

- a) 4
- b) 1
- c) 3
- d) 2

2. The probability of each event lies between:

- a) 1 and 2
- b) 1 and 10
- c) 0 and 1
- d) 0 and 5

3. If $P(E) = 0.44$, then $P(\text{not } E)$ will be:

- a) 0.44
- b) 0.55
- c) 0.50
- d) 0.56

4. If $P(E) = 0.38$, then probability of event E, not occurring is:

- a) 0.62
- b) 0.38
- c) 0.48
- d) 1

5. A dice is thrown. The probability of getting 1 and 5 is:

- a) $\frac{1}{6}$
- b) $\frac{2}{3}$
- c) $\frac{1}{3}$
- d) $\frac{1}{2}$

6. Which of the following best describes random sampling?

- a) Selecting individuals who volunteer for a survey
- b) Choosing participants based on specific characteristics
- c) Picking individuals randomly, ensuring each has an equal chance of being chosen
- d) Surveying the entire population to get accurate results

7. When organizing data in tabular form, what is the purpose of column headings?

- a) To make the table visually appealing
- b) To occupy space and improve layout
- c) To provide context and describe the information in each column
- d) To make the table larger and more noticeable

8. You conducted a survey on students' favorite book genres and organized the data in a table. What is the most appropriate next step?

- a) Draw conclusions without discussing the data
- b) Ignore the data and move to another topic
- c) Analyze and interpret the data to gain insights
- d) Organize the data in a pie chart for better visualization

9. A circle graph is used for

- a) displaying continuous data only
- b) displaying data that are always in percentages
- c) displaying discrete data only
- d) displaying both discrete and continuous data

10. Performing an event once is called

- a) Sample
- b) Trail
- c) Error
- d) None of the above
