Read the text.

Bears are fast runners, excellent swimmers and good climbers. Bears can weigh 750 kg and can get up to 3 meters long. Bears are found in the continents of North America, South America, Europe and Asia. Bears can live for 25 - 30 years. They eat plants, nuts, insects, birds, fish and other small animals. Bears are black and brown. Bears sleep all winter, they don't eat and drink in winter.

2
