VOCABULARY

look

A descriptive word, also known as an adjective, is a word that describes or modifies a noun or pronoun by giving more information about its qualities, characteristics, or attributes. Adjectives add detail to sentences, helping to paint a clearer picture or provide more context about the noun they modify. For instance, in the sentence "The red apple is juicy," the word "red" is a descriptive word or adjective because it provides additional information about the apple by specifying its color.
