

How to Grow a Plant

Plants need three things to grow. They need sunlight. They need **soil**. They need water.

1. Find a place for your **plant**. You need a **sunny** spot. The plant will use sunlight to make food.

2. Put soil in a pot. Put a seed in the soil. Do not push it down too far!

3. Water the soil. Water it a little every day. Soon you will have a **healthy** plant!

Plants need sunlight to grow.
