

Debunking Gender Myths

Fill in the gaps with the words from the box:

domestic it takes two to tango meet them halfway
--

Men apologize less frequently than women.

TRUE!

Although 1) _____, men are less likely than women to apologize after a fight. A study by the University of Waterloo in Ontario, Canada, found that while both sexes believe that apologizing is important, men have a higher threshold for what constitutes offensive behaviour and are therefore less likely to say sorry. The research also found that women may be more inclined to apologize as a way of getting men to 2) _____ after they have a 3) _____.

Women have better senses of smell and taste.

TRUE!

They have 50 more cells (neurons) in their olfactory bulbs—the part of the brain responsible for processing smells. Women also usually have more taste buds than men.
