

ACTIVITY #3

1. Multiple -choice questions by inference (previous reading).

1. What is the primary focus of AI Ethics?

- a) Enhancing government structures
- b) Ensuring fast-growing technology
- c) Responsible AI encompassing safety
- d) Developing large AI models

2. Why can poorly constructed AIs demonstrate bias?

- a) Due to their inability to process information
- b) Because they lack safety measures
- c) AIs do not learn from data
- d) They learn from poorly represented subsets of the data

3. What is the potential risk associated with poorly constructed AIs, according to the reading?

- a) Loss of revenue
- b) Environmental impact
- c) Increased efficiency
- d) Positive business value

4. What do researchers aim to achieve in developing energy-efficient AIs?

- a) Larger models
- b) Improved training techniques
- c) Balancing performance and energy efficiency
- d) Increased resource consumption

5. Why is AI Ethics becoming a critical part of AI literacy for most people?

- a) To create larger AI models
- b) Due to legal requirements like the AI Act
- c) To avoid bias in AI algorithms
- d) It has no relevance to AI literacy
