

Solve each problem.

Answers

- 1) For Halloween Debby and her sister combined the candy they received. Debby had thirty-two pieces of candy while her sister had forty-two. If they ate thirty-five pieces the first night, how many pieces do they have left?
- 2) A pet store had thirteen siamese cats and five house cats. During a sale they sold ten cats. How many cats do they have left?
- 3) Luke was trying to expand his game collection. He bought two games from a friend and bought two more at a garage sale. If two of the games didn't work, how many good games did he end up with?
- 4) The school cafeteria ordered forty-two red apples and seven green apples for students lunches. But, if only nine students wanted fruit, how many extra did the cafeteria end up with?
- 5) Lana picked thirty-six tulips and thirty-seven roses to make flower bouquets. If she only used seventy of the flowers though, how many extra flowers did Lana pick?
- 6) Carol and her mom were picking carrots from their garden. Carol picked twenty-nine and her mother picked sixteen. If only thirty-eight of the carrots were good, how many bad carrots did they have?
- 7) Roger had sixteen dollars. For his birthday he got twenty-eight more dollars but spent twenty-five on a new game. How much money does he have now?
- 8) While on vacation, Megan took fifteen pictures at the zoo and eighteen at the museum. If she later deleted thirty-one of the pictures, how many pictures from her vacation did she still have?
- 9) Rachel bought two coloring books. One had twenty-three pictures and the other had thirty-two. After one week she had already colored forty-four of the pictures. How many pictures does she still have to color?
- 10) Ned had to wash nine short sleeve shirts and twenty-one long sleeve shirts before school. If he had only washed twenty-nine of them by the time school started, how many did he not wash?
