Careers in the Arts

Not all professions are technical in nature. It is possible to make a living working in artistic careers. If you like to work with colors and figures, you can be a painter or a sculptor. You can also be an illustrator, where you make the words in children's stories come to life. You can be a graphic designer and work with a computer to make advertisements, pamphlets or textbook layouts like the one you are using now! Another way to use art in a career is in interior design. These people determine how to design the inside of a house. This includes matching colors and patterns, floors and walls, and even deciding what furniture and light fixtures to put in each room. They create warm and comfortable interiors that make people want to go home every night. If you like the theater and movie venues, you can become a hair or makeup artist. These professionals transform actors and actresses into their characters and create a new person. Along with the costume designers who create the clothes for the actors and actresses, these people give life to the characters of a script. There are also set designers that design and construct the sets or background for movies or plays. There are plenty of options in the arts that allow you to be creative, express yourself artistically, and also make a living. So if you have an artistic talent, let it help you to build your future!

Art Career	What people do
A. <u>Painter</u>	a. <u>Create masterpieces with paint.</u>
B.	b.
C.	c.
D.	d.
E.	e.
