

The Microsoft Internet Explorer interface

Let's take a look at the main tools and features of Microsoft Internet Explorer.

The navigation buttons allow you to move backward and forward between the web pages you have visited.

The favourites button allows you to save and quickly access your favourite websites and history.

Enter a website address into the address bar to go to a particular website.

Enter keywords into the search bar to find websites on the subject you are searching for.

Web pages will be displayed in this part of the application.
