

1. A bicycle costs \$55.

A tricycle costs \$20 less than the bicycle.

- (a) How much does the tricycle cost?

$$55 - 20 = \boxed{}$$

- (b) How much do the bicycle and the tricycle cost altogether?

$$55 + \boxed{} = \boxed{}$$

2. There were 54 girls in a water park.

There were 16 more boys than girls in the waterpark.

- (a) How many boys were there in the waterpark?

$$54 + 16 = \boxed{}$$

- (b) How many boys and girls were there in the waterpark?

$$54 + \boxed{} = \boxed{}$$

3. Alyara scored 49 points in a game.

Alisha scored 40 more points than Alyara.

- (a) How many points did Alisha score?

$$49 + 40 = \boxed{}$$

- (b) How many points did Alyara and Alisha score altogether?

$$49 + \boxed{} = \boxed{}$$
