PARAGRAPH 4

Words	Definitions
12 ..... kinesthetic[1]	**L** v., to move constantly in a nervous manner
13 ..... conventional	**M** adj., normal; traditional
14 ..... fidget	**N** adj., related to body motion
15 ..... manipulate	**O** v., to move things around with the hands

PARAGRAPHS 4–6

Words	Definitions
16 ..... incorporate	**P** n., praise; support to keep going
17 ..... encouragement	**Q** adj., more important, stronger
18 ..... solitary	**R** v., to add in; bring together
19 ..... expose	**S** v., to give an opportunity to experience or learn new things
20 ..... dominant	**T** adj., done alone; independent

Reading

Learning Styles

(1) There are three basic types of classroom learning styles: visual, auditory, and kinesthetic[1]. These learning styles describe the most common ways that people learn. Individuals tend to instinctively prefer one style over the others; thus each person has a learning style that is dominant even though he or she may also rely somewhat on the other **approaches** at different times and in different **circumstances**.

(2) Visual learners prefer to sit somewhere in the classroom where no **obstructions hinder** their view of the lesson. They rely on the teacher's **facial** expressions and body language to aid their learning. They learn best from a **blend** of visual displays and presentations

[1]BrE: kinaesthetic

such as colorful[1] videos, **diagrams**, and flip-charts. Often, these learners think in pictures and may even close their eyes to visualize[2] or remember something. When they are bored, they look around for something to watch. Many visual learners lack **confidence** in their **auditory** memory skills and so may take detailed notes during classroom discussions and lectures.

(3) Auditory learners sit where they can hear well. They enjoy listening and talking, so discussions and **verbal** lectures stimulate them. Listening to what others have to say and then talking the subject through helps them process new information. These learners may be heard reading to themselves out loud because they can absorb written information better in this way. Sounding out spelling words, **reciting** mathematical theories, or talking their way across a map are examples of the types of activities that improve their understanding.

(4) **Kinesthetic** learners may find it difficult to sit still in a **conventional** classroom. They need to be physically active and take frequent breaks. When they are bored, they **fidget** in their seats. They prefer to sit someplace where there is room to move about. They benefit from **manipulating** materials and learn best when classroom subjects such as math, science, and reading are processed through hands-on experiences. **Incorporating** arts-and-crafts activities, building projects, and sports into lessons helps kinesthetic learners process new information. Physical expressions of **encouragement**, such as a pat on the back, are often appreciated.

(5) In addition to these traditional ways of describing learning styles, educators have identified other ways some students prefer to learn. Verbal learners, for example, enjoy using words, both written and spoken. Logical learners are strong in the areas of logic and reasoning. Social learners do best when working in groups, whereas **solitary** learners prefer to work alone. Research shows that each of these learning styles, as well as the visual, auditory, and kinesthetic styles, uses different parts of the brain. Students may prefer to focus on just one style, but practicing[3] other styles involves more of the brain's potential and therefore helps students remember more of what they learn.

(6) Teachers who present their lessons using varied techniques that stimulate all learning styles **expose** students to both their **dominant** and less preferred methods of learning, aiding them to more fully reach their potential as learners.

Listening

Track 25

Listen to the lecture. Complete the notes below.
*Write **NO MORE THAN ONE WORD** for each answer.*

Needs of Different Students

Visual Learners:
They need to see the teacher's face.
They need lessons with **1**..... and pictures.

Auditory Learners:
They need to hear words.
They need to read aloud and **2**..... rules.

Kinesthetic Learners
They need to do things.
They need to move around and **3**..... items.

All students need **4**..... .

Writing (Task 2)

Confidence in oneself is an important part of learning. What factors in a classroom can contribute to a student's feeling of confidence?

Give reasons for your answer and include examples from your own knowledge or experience.

Write at least 250 words.

Speaking

Talk about the following topics.

Think about the three learning styles—visual, auditory, and kinesthetic. Which do you think is your dominant style? Why?

Would you describe yourself as a solitary learner or a social learner?

What things hinder your learning?
