

Mount Hekla, Reykjavik, Iceland

Mount Hekla is a famous volcano near Reykjavik, in Iceland. Mount Hekla is one of the most famous and active volcanoes in Iceland.

Mount Hekla is not a very high volcano. It is about 1491m high. It has many layers (地層), so it is called a composite volcano.

It has unique

scenery (獨特的風景) and many people go hiking around the volcano. But, they have to be very careful!

Mount Hekla is an active volcano (活火山) and can erupt (爆發) at any time. The last big eruption was in 2000. The steam (蒸汽) and ash

flew very high into the sky, but no houses were damaged (被損壞). Luckily, no people or animals died.

Mount Hekla is a very powerful and dangerous volcano!
