

AREA DE POLIGONOS REGULARES

Estos son figuras geométricas que tienen todos sus lados y ángulos iguales. Para calcular su área, es necesario aplicar la formula:

$$\text{AREA} = \frac{\text{Perímetro} \times \text{apotema}}{2} = (A = P \times A / 2)$$

Calcula el área de los siguientes polígonos.

$$A =$$

$$A =$$

$$A =$$

$$A =$$
