

## Unit 7 Lesson 2

1 Listen and read. What is different about energy in Iceland?

Luke: This bus uses energy from water.  
It doesn't use gas.

Mia: That's amazing!

Luke: In the future, all the buses, cars,  
and boats in Iceland will use  
energy from water.

Mia: Why?

Luke: There won't be any gas in the  
world. We're using it all. So  
Iceland will be a great place to  
live. The air will be cleaner.  
There won't be any pollution.

Mia: So water is really important here.

Luke: Yeah. They make electricity with  
energy from water.

Mia: In the future, we'll make  
electricity with energy from  
water in our country, too.

Luke: Yes, I think we'll use energy from  
the sun, wind, plants, and water.

2 Complete the sentences.

- 1 Buses in Iceland are different because \_\_\_\_\_
- 2 In the future, buses, cars, and boats won't \_\_\_\_\_
- 3 The air will be cleaner in Iceland because \_\_\_\_\_
- 4 Water is really important in Iceland because \_\_\_\_\_
- 5 When there isn't any gas in Mia and Luke's country,  
they will \_\_\_\_\_

### Grammar Stop

When we imagine the world in the  
future, we use **will/won't**.

*In the future, we'll make electricity with  
energy from water ...*

*We won't have cars*

What's the short form of We will?

What's the short form of We will not?

3 Talk to a friend about the future. Use **will** or **won't**.
