

Unit 7 Lesson 5

1 Listen and read. Then write the words next to the definitions.

The weather on our **planet** is **changing**. There are dangerous **hurricanes** every year with very strong winds and lots of rain. The ice in the **glaciers** is **melting**. There are **floods** in some countries, but there isn't any water in other countries. Why is it changing? One reason is because we're using lots of energy.

planet noun The world is a ...

_____ verb (+ing) It's hot. The ice is ...

_____ noun A ... is a river of ice.

_____ verb (+ing) The leaves are ... color from green to brown

_____ noun (plural) When it rains for many days, there are ...

_____ noun (plural) ... are extremely windy and rainy storms.

2 Listen to the song. Match the pictures to the verses.

☐ The glaciers are melting.
The oceans are warm.
The weather is changing.
With floods and with storms.

We are the future!
The planet is ours!
We can save energy!
We have the power!

☐ We'll walk to school,
Or take the school bus,
We won't take long baths,
It's showers for us

☐ We'll recycle garbage.
And then before night,
We'll turn off the TV,
Computers, and lights.
