

1 Listen and read. What are Luke and Mia visiting?

Mia: Brr! It's cold on this glacier.

Guide: Last year it was colder. The weather in Iceland is changing.

Mia: Will this glacier melt in the future?

Guide: Yes, I think it will. It's melting now. Listen.

Luke: I can hear water. Will there be floods?

Guide: Yes, there will.

Luke: Will they be dangerous?

Guide: No, they won't. The ice is melting slowly.

Mia: There are so many glaciers on this island and they're all melting. Will Iceland melt into the ocean in the future?

Guide: No, it won't. The glaciers are melting, but we'll save energy and we'll save our island. Iceland will always be on the planet.

2 Write the answers in your notebook.

- 1 Why was it colder on the glacier last year?
- 2 Why can Luke hear water?
- 3 Why won't the floods be dangerous?
- 4 What does Mia think may happen to Iceland in the future?
- 5 Does the guide think the same?
- 6 How will the people who live there save Iceland?

Grammar Stop

Circle the two possible answers to the question: *Will Iceland melt?*
