

## Activity 9

### Observe Like a Scientist

#### Big City Environmental problems

Using fossil fuels can have negative impacts on the environment.  
Read the text, and look for reasons **why big cities have air pollution problems.**

Pesticides – chemicals - smog - Burning fuels

..... for energy pollute the air .

..... causes widespread irritation to eyes and lungs.

..... used in farms can be carried into streams when it rains .

..... used at many factories can pollute the air as well as the soil nearby factories.
