B. Sample paragraph :

Title: Two Video Games

PUBG and FIFA have many similarities and differences. PUBG is like FIFA because they are both famous video games all over the world. Also, you can buy players in both games. Similarly, both games can make you frustrated and angry. I know this because I always feel anxious when I play them. However, PUBG and FIFA are different in many ways. PUBG is about players shooting and killing other players in a battlefield. Whereas, FIFA is about playing football with other players. Another difference is that PUBG might teach kids to become violent, but FIFA teaches kids more about football which is something positive. Moreover, the players in PUBG are armies, but in FIFA they are football players. Finally, PUBG is about maps with different settings. On the other hand, FIFA is mostly about playing football only. In conclusion, as you can see FIFA and PUBG have many things in common and are also different at the same time.
