

ECUACIONES

1. Resuelve las siguientes ecuaciones y escribe el valor de la incógnita:

$$2x = 24$$

$$x = \boxed{}$$

$$5 + b = 18$$

$$b = \boxed{}$$

$$5e = 40$$

$$e = \boxed{}$$

$$2f = 30$$

$$f = \boxed{}$$

$$x + 9 = 34$$

$$x = \boxed{}$$

$$7 + c = 32$$

$$c = \boxed{}$$

$$a + 7 = 49$$

$$a = \boxed{}$$

$$3d = 32$$

$$d = \boxed{}$$

$$15 + h = 32$$

$$h = \boxed{}$$

$$g - 13 = 40$$

$$g = \boxed{}$$

2. Elige la opción correcta:

Ecuación	Valor de la incógnita
$6 + k = 19$	
$2 + 7 + m = 20$	
$2n = 18$	
$p - 8 = 15$	
$17 - r = 8$	
$8s = 24$	
$10 + t = 36$	
$\frac{t}{3} = 14$
