

GENIO PRACTICANDO PROPIEDADES DE LA SUMA

Aplica la propiedad conmutativa de la suma

• $13 + 5 = \underline{\quad} + \underline{\quad}$
 $\underline{\quad} = \underline{\quad}$

• $17 + 6 = \underline{\quad} + \underline{\quad}$
 $\underline{\quad} = \underline{\quad}$

Aplica la propiedad asociativa de la suma

$(34 + 19) + 12 = 34 + (19 + 12)$
 $\begin{array}{c} \downarrow \\ \square + \square \\ \downarrow \\ \square \end{array} = \begin{array}{c} \downarrow \\ \square + \square \\ \downarrow \\ \square \end{array}$
 $\square = \square$

$(27 + 60) + 21 = 27 + (60 + 21)$
 $\begin{array}{c} \downarrow \\ \square + \square \\ \downarrow \\ \square \end{array} = \begin{array}{c} \downarrow \\ \square + \square \\ \downarrow \\ \square \end{array}$
 $\square = \square$

$(29 + 15) + 6 = 29 + (15 + 6)$
 $\begin{array}{c} \downarrow \\ \square + \square \\ \downarrow \\ \square \end{array} = \begin{array}{c} \downarrow \\ \square + \square \\ \downarrow \\ \square \end{array}$
 $\square = \square$

$(47 + 10) + 41 = 47 + (10 + 41)$
 $\begin{array}{c} \downarrow \\ \square + \square \\ \downarrow \\ \square \end{array} = \begin{array}{c} \downarrow \\ \square + \square \\ \downarrow \\ \square \end{array}$
 $\square = \square$
