- Use a credit card or other hard flat object to scrape the black bee stinger out of your skin if the bee left one.
- Treat the bee sting with a wet aspirin tablet-if you're not allergic to aspirin – wipe it over the bee sting bump. This anti-inflammatory helps to ease swelling and pain from the bee sting.
- Baking soda or ammonia solution also reduces pain from a bee sting by changing the acidity of the sting site.
- Use a paste of meat tenderizer on the bump. This helps to 'digest' the chemicals in the bee sting that make it so painful.
