

My name is Adam. I'm forty-six and I live in Boston, the USA. I am a doctor. I work in the local hospital. I'm a dermatologist. My working day usually starts at eight o'clock and ends at six o'clock. Once a week I stay at the hospital at night because I'm **on duty**. After that I have a rest day.

I have a family. My wife's name is Helen and she is forty-four. She is a programmer and she works in the big IT Company. She really loves her job. Sometimes she takes her work home and sits at her laptop until night. We have two kids: daughter Erika and son Billy. Erika is seventeen, she studies at high school and she will graduate this year. She studies a lot because she wants to get into Medical school at Harvard University. Erika wants to be **a surgeon**. Billy is only nine and he goes to the primary school. He likes sport. Billy plays baseball in school team. Also he loves computers like his mum. Helen teaches him to make computer programs.

My father lives with us too. He is seventy-nine but he's very strong and healthy. He likes to play baseball with Billy. Also he loves to read. Twice a week he visits Reading club.

My family lives in a big house. We have four bedrooms, a large living-room three bathrooms and a nice kitchen. Also we have a small garden and a garage for three cars. My wife, Erika and I have our own cars. My father doesn't drive, he usually takes the bus.

on duty – на чергуванні

a surgeon – хірург

1. Answer the questions:

- 1) What is Adam's job?
- 2) What is Helen's job?
- 3) What are Adam's children's names?
