3 Read and complete. Listen and check.

Which invention do you think is the most useful?

The helps us to travel quickly to distant places.

The helps us to cook food quickly.

The is useful on our clothes and backpacks and is important when we go outside on a sunny day. But I think the most important invention is the because I love playing video games!

I like the because it's fun to jump on! My dad says the is important because he loves music, and my mum thinks the is the most important invention because she can work anywhere. The is also useful because you can change TV programmes easily. But for me, the most important invention is the because we can use it to talk to friends, send messages and play games.
