

1. Match the words with the meanings

- | | |
|----------------------|------------------------------|
| 1. in all likelihood | a. keep |
| 2. remain (v) | b. rational |
| 3. not unreasonable | c. agreed by a lot of people |
| 4. widely accepted | d. deal with |
| 5. address (v) | e. very probably |

2. Select the correct option.

- A. **In all likelihood, / It's very likely** surviving on a desert island on your own would be challenging.
- B. It's **widely/wide** accepted that in a survival situation, the most relevant needs are food, water and shelter.
- C. While food may seem the obvious need to **remain/address**, shelter is as significant as the former.
- D. **In all likelihood, / It's very likely** that anyone, regardless of their job, would face insurmountable challenges when trying to get by on an island.
- E. **Remaining/Addressing** resilient when surviving on a desert island is one of the toughest challenges.
- F. It's **unreasonable/not unreasonable** to imagine that the presence of an engineer, when it comes to shelter, would mean the difference.

3. Complete with words from the box

widely accepted – not unreasonable – no profession – very likely – in all likelihood

- I. This suggests that there is _____ more useful than a doctor on a desert island.
- II. _____, surviving on a desert island will demand a combination of ingenuity, resilience, and adaptability, as individuals must contend with the harsh environment, limited resources, and the psychological toll of isolation.
- III. Survivors on a desert island are _____ to face numerous challenges, including building shelter to protect against the elements, and devising strategies to attract attention for potential rescue.
- IV. It's _____ that staying mentally resilient and resourceful is essential for surviving on a desert island, where one must navigate harsh conditions, limited resources, and isolation until rescue or escape is possible.
- V. It's _____ to prioritize basic survival needs such as finding shelter, sourcing food and water, and establishing a means of signaling for rescue when stranded on a desert island.
