

PRE-LISTENING

There are some vocabularies that will appear on the recording. Let's guess the meaning of each vocabulary by dragging its meaning equivalent to the vocabulary.

Sort elements

- to reach the standard of ability or knowledge needed to do a particular job, for example by completing a course of study or passing exams
- to communicate with somebody, especially by writing to them or phoning them
- a person who does a job that needs special training and a high level of education
- in a way that happens fairly often and regularly
- to do physical work

get in contact with somebody (phrasal verb):	
periodically (adv):	
qualify (verb):	
get your hands dirty (idiom):	
professional (noun):	

DURING LISTENING

**What is the desired outcome to each of the following course of action?
Choose FIVE answers from the box and write the correct letter, A-F, next
to questions 26-30.**

--

Sort elements

A. practical experience C. join Machine Engineer Society E. stay up to date

B. publish the work D. give suggestions F. make important contacts

Question 26: Make a good grade	
Question 27: Meet engineering professionals	
Question28: Visit the factory	
Question 29: Seek summer internships	
Question 30: Present dissertation	

VOCABULARY PRACTICE

Let's listen to the recording again and fill in blanks below

KATHY: Who would have thought before we started this project that we would be able to recreate the motion of a pump? This stuff is just so interesting.

TUTOR: So glad to hear it!

JIMMY: Yeah, I am glad I took engineering this semester. I would definitely like to keep up with it.

TUTOR: You know, there's an organisation called the Machine Engineer Society. You should look into **1** it. You would need to **2** well in your engineering class to **3**, but I think you can do it.

KATHY: Hm, interesting. I will **4** check it out. I would really like to **5** some **6** in the engineering field to find out more. I don't really know anyone in the field now, though.

JIMMY: I think if you keep meeting people in your classes and professors you'll be able to get in contact with some really **7** people.

TUTOR: Well said, Jimmy. If engineering pumps is something you both are **8** interested in, make sure you stay up to date on new **9**. In fact, you could visit the local water treatment facility **10** to see what new developments are going on.

KATHY: Hm, that may be a good way to get some **11** experience.

TUTOR: Well, I don't think they would let you **12** any equipment by just visiting the facility. If you really want to **13**, so to speak, I would recommend instead **14** a summer internship.

KATHY: Wow, you have so many helpful **15** for getting a leg up. Now if only you could tell me how to get my work **16**!

JIMMY: Haha, wouldn't that be nice.

TUTOR: Well, **17**, all you really need to do is once you have a **18**, present it. Present it often and to many **19**, and once you get **20**, adjust it. You'll get published one day.

KATHY: Wow, this meeting has been truly **21**. Thanks for your help!
