

FIBL – APRIL PREDICTION 12

#80 CEO's Duty

That brings us to the CEO's second duty: building or more accurately, building the senior team. All the executives report to the CEO, so it's the CEO's job to, fire, and manage the executive team. From CEOs, I actually think this is the most important skill of all. Because when a CEO hires an excellent senior team, that team can keep the company running. when a CEO hire a poor senior team, the CEO is up all of their time trying to do with the team, and not nearly enough time trying to do with other elements of their job. The senior team can and often does the strategy for the company, but ultimately it's always the CEO who has the final 'go-no-go' decision on strategy.

#79 Dropping Out

A majority of U.S. high school students say they get..... in class every day, and more than one out of has considered dropping out, according to a survey released on Wednesday. The survey of 81,000 students in states found two-thirds of high school students complain of boredom, usually because the subject matter was or their teachers didn't seem to care about them.

#72 Integrated Ticketing

Well in 2004 we integrated ticketing in South East Queensland, so we have a paper ticket that allowed you to travel across all the three in South East Queensland, so bus, train and and the second stage of integrated ticketing is the introduction of a Smart Card, and the Smart Card will enable people to value so to put value on the card, and then to use the card for around the system.

#71 Japanese Researchers

For the first time, Japanese researchers have conducted a real-life experiment that shows how some traffic jams appear for no apparent reason. They placed the 22 vehicles on a track, and asked the drivers to cruise around at a

..... speed of 30 kilometers an hour. At first, traffic moves smoothly, but soon, the distance between cars started to and vehicles clumped together at one point on the track, but the jams backward around the track, like a shockwave at a rate of about 20 kilometers an hour. Real-life jams move backward at about the same speed.

#73 Online Dating

Bruch and her colleague Mark Newman studied who swapped messages with whom on a popular online dating platform in the month of January 2014. They users by desirability using PageRank, one of the algorithms behind search technology. if you receive a dozen messages from desirable users, you must be more desirable than someone who receives the same number of messages from average users. Then they asked: How far "out of their league" do online daters tend to go when pursuing a partner ? "I think people are optimistic In other words, they found that both men and women tended to pursue mates just 25 percent more desirable than themselves. "So they're being optimistic, but they're also taking into account their own relative position within this overall desirability hierarchy." And the study did have a few more for people on the market: "I think one of the take-home messages from this study is that women could probably afford to be more aspirational in their pursuit."
