

Activity 8

Read the statements and answer if it is true or false.

Statement	True or False
When you work with 3D design and printing, you design and create objects that have 3 dimensions.	
A polygon is a closed figure that only has two straight line segments.	
When you watch a movie, the picture seems to be flat. This means it has only one dimension (1D).	
Polygons are the basic shapes used in 3D; they are used to build shapes in the 3D workspace.	
A triangle has 2 sides.
