Space Station, 5th June

Today was a tiring day. First, I had a shower and then I put on my space suit. I had to go out in space and fix some parts of the space station. I did some exercise for about an hour in the evening. It's important to keep our bodies moving here in space, so our heart and muscles stay healthy. John left for Earth last week. He sent me a message that he arrived well. I'm so happy! Mary is still here. She ate dinner with me last night and we talked about life on Earth. We miss the trees and the ocean! I went to bed thinking about all my family and I had a dream that I was there. When I woke up, I felt great.

There are still two weeks to go before I go back home.
