

**Read the information below. Write a process text of at least 80 words about how your respiratory system works.**

<i><b>Cause</b></i>	<i><b>Effect</b></i>
You breathe in.	⇒ Oxygen goes into your lungs.
Your lungs expand and shrink faster.	⇒ Oxygen goes with the blood to your muscles.
Your muscles use oxygen and create.	⇒ Carbon dioxide goes with the blood through the veins and out of the lungs.

**You should use words to show cause and effect in your writing.**
