

1. Определите размеры предметов

2. Переведи в мм

$$2 \text{ cm} = \quad \text{mm}$$

$$1 \text{ cm } 4 \text{ mm} = \quad \text{mm}$$

$$5 \text{ cm } 9 \text{ mm} = \quad \text{mm}$$

3. Выполнить вычитание по образцу

$$2 \text{ cm} - 6 \text{ mm} = 20 \text{ mm} - 6 \text{ mm} = 14 \text{ mm}$$

$$3 \text{ cm} - 9 \text{ mm} = \quad \text{mm} - \quad \text{mm} = \quad \text{mm}$$

$$7 \text{ cm} - 5 \text{ mm} = \quad \text{mm} - \quad \text{mm} = \quad \text{mm}$$

4. Решите уравнение

$$X + 23 = 56.$$

$$X =$$

$$X = \underline{\hspace{2cm}}$$

$$X - 23 = 34.$$

$$X =$$

$$X = \underline{\hspace{2cm}}$$

$$67 - x = 33$$

$$x =$$

$$x = \underline{\hspace{2cm}}$$
