SANGKURIANG

Once upon a time in West Java, Indonesia, lived a princess named Dayang Sumbi. She was beautiful and kind-hearted. Her hobby was weaving cloth. But sometimes she could be very lazy. One day her weaving tool fell, but she was too lazy to get it herself. She shouted out, "Can anybody help me get my tool? If you are a female, I will take you as my sister. If you are a male, I will marry you!"

A male creature came, but it was a dog. His name was Tumang. He happily brought the tool to her. Dayang Sumbi was very surprised, but she kept her promise. She married the dog. Tumang was actually a man who had been cursed by a witch to become a dog. But at certain times Tumang could turn back to be a normal man. Their only son, Sangkuriang, was soon born, and he grew up to be a handsome and healthy boy. He always played with his very loyal dog, Tumang. He did not know that he was actually his father, because Dayang Sumbi hid the secret from him. Sangkuriang liked to hunt in the woods, of course with Tumang.

One day Dayang Sumbi asked him to bring home a deer's heart. But, after hunting for several days, he could not find any deer in the woods. He did not want to disappoint his mother and was thinking hard how to bring home a deer's heart. Suddenly, he had a very bad idea. He killed Tumang! Then, he brought his heart home and gave it to Dayang Sumbi. Sangkuriang could not cheat her. She knew it was Tumang's heart. So, she got very angry and hit Sangkuriang's forehead with a piece of wood and told him to leave. With a bad wound on his forehead, Sangkuriang left the village.

Many years later, Sangkuriang grew up to be a powerful man. One day he went back to his village. He met a beautiful young woman there, and he fell in love with her at the first sight. It was Dayang Sumbi! She never got older because she had been granted eternal youth by the gods. Sangkuriang did not know that she was his mother, so he came to her and proposed to marry her. When he walked closer to her, Dayang Sumbi got very surprised. She saw the scar in Sangkuriang's forehead, and soon she knew that he was her son, who left her a long time ago. She told him the truth and tried hard to explain it to him, but he did not believe her. She did not want to break his heart, so she accepted his proposal but gave him an impossible thing to do. She wanted him to build a lake and a boat in just one night!

Sangkuriang agreed, because he knew that he could make it with the help of his genies. By midnight he finished the lake and then started making the boat. Dayang Sumbi was thinking hard to find a way to fail him. Before dawn, she asked the people in the village to burn the woods in the East, and the light made all the cocks crow. Thinking that the night would be over soon, the genies ran fast and left Sangkuriang before the boat was finished. Sangkuriang realized that Dayang Sumbi had cheated him. He got very angry and he kicked the boat upside down. It gradually became a mountain and it is now known as Mt. Tangkuban Perahu.

The text for question number 16.

The Golden Star-Fruit Tree

A long time ago there was a rich old man living in Vietnam. He had two sons with different attitudes. The older brother was very greedy and the younger brother was very kind. When the old man died, the brothers divided his father's wealth into two parts. The big brother took almost everything. He gave his younger brother only a small piece of land, with a star-fruit tree in front of it. From then on the younger one lived there and made his living only by selling star fruits from the tree. The star fruit tree had an exceptional amount of fruits.

Unfortunately, a very big raven often came and ate all the ripe fruits. At first he was too afraid of the raven, and did not know what to do. But one day he dared to approach the raven. He begged it not to eat the fruits. Surprisingly the raven was not angry. He said that he will pay the fruits with gold. From then on, the younger brother and his family could live happily in luxury.

On the commemoration of his father's death, the younger brother invited his older brother to come to his house. At first the big brother refused to come. But because his younger brother insisted, he and his wife finally decided to come. When they got to the younger brother's house, they were surprised to see that he was now very rich. He asked his younger brother how he had got all his wealth and the younger brother was happy to tell him the truth. Then the greedy brother and his wife offered the younger brother to trade all their fortune for the star-fruit tree. The younger brother gladly accepted the offer. When the raven came for the star fruits, the older brother made the same plea. As expected, the raven told him to bring a 1-meter long bag. Because he was greedy, he asked his wife to make a much longer bag. Because the load became too heavy for the raven, it swayed, and the greedy brother fell straight down to the sea with his bag and pockets full of gold. He sank very fast down the sea. The older brother finally died. He died because of his greediness.

Elephants Elephants are large mammals of the family Elephantidae and the order Proboscidea. Two species are traditionally recognised, the African elephant (<i>Loxodonta africana</i>) and the Asian elephant (<i>Elephas maximus</i>), although some evidence suggests that African bush elephants and African forest elephants are separate species (<i>L. africana</i> and <i>L. cyclotis</i> respectively). Elephants are scattered throughout sub-Saharan Africa, South Asia, and Southeast Asia. Elephantidae is the only surviving family of the order Proboscidea; other, now extinct, members of the order include deinotheres, gomphotheres, mammoths, and mastodons. Male African elephants are the largest extant terrestrial animals and can reach a height of 4 m (13 ft) and weigh 7,000 kg (15,000 lb). All elephants have several distinctive features, the most notable of which is a long trunk or proboscis, used for many purposes, particularly breathing, lifting water and grasping objects. African elephants are listed as vulnerable by the International Union for Conservation of Nature (IUCN), while the Asian elephant is classed as endangered. One of the biggest threats to elephant populations is the ivory trade, as the animals are poached for their ivory tusks. Other threats to wild elephants include habitat destruction and conflicts with local people”....”. https://www.kuliahbahasainggris.com/report-text-tentang-binatang-elephant-	Rhinoceros Rhinoceros is four-legged bulky herbivorous mammals with one or two horns located right above its nose. We may know them by the short version of their name “Rhino”. They are considered to be one of endangered animals by the International Union for Conservation of Nature (IUCN). In Indonesia, we can find them in Sumatera and Java, especially in Ujung Kulon National Park. Rhinoceros have a large and muscular body with four short legs. They have a big head and a very short neck. The position of their head is lower than their back which makes the head seems like facing downward all the time. There are one or two horns on their head located on their nose which became their unique feature. It is made of keratin, the same substance that build up hair and fingernails. Their body is covered with a thick layer of collagen. The pregnancy period of a Rhinoceros is different from one species to another, but mostly it took up to 18 months for the baby to be born. A full-grown Rhinoceros can reach the height of 1,8 m with approximate weight of 2.300 kg. They can run at the speed of 50 to 55 km/h. They can live up to 50 years. They have a short-range sight but they have a good hearing and smelling. http://britishcourse.com/contoh-Report-text-rhinoceros.php
