Nama : _____

Kelas : _____

Mapel: Geografi

Sekolah : SMAN 1 Prabumulih

Tulishlah jawaban kamu pada kotak yang tersedia!

The diagram illustrates the layers of Earth's atmosphere, starting from the surface and moving upwards. The layers are labeled as follows:

- Exosfer** (outermost layer, shown as a thin blue line)
- Troposfer** (the layer closest to the surface, shown with clouds and a plane)
- Mesosfer** (the layer above the troposphere, shown with a meteor)
- Stratosfer** (the layer above the mesosphere, shown with a balloon)
- Termosfer** (the outermost layer, shown with a satellite)

Below the diagram, there are five empty boxes for labeling the layers:

- Exosfer
- Troposfer
- Mesosfer
- Stratosfer
- Termosfer

MENGENAL LAPISAN ATMOSFER

Ayo jodohkan lapisan atmosfer dibawah ini sesuai dengan karakteristiknya!

Termosfer

Stratosfer

Eksosfer

Mesosfer

Troposfer
