Open the document you
want to print on your device

Go to the file or options
menu of that program

Look for the "Print" option or
a printer icon. You can
usually find it at the top of
the menu.

Click "Print." A window will
open with printing options

Be sure to select the printer
you want to use if you have
more than one.

Check print settings such as
number of copies, page
range, orientation (landscape
or portrait), etc.

Once you have reviewed all
the settings, click "Print" or
"OK."
