8. What is the text about?
   Direction to a park.
   Entertainment in a park.
   Advertisement of a park.
   Announcement from a park.
9. "Are you ***looking for*** a convenient place to spend the weekends?"
   The synonym of the bolded word is ….
   examining
   visiting
   searching
   suspending
10. Who might need the information?
    Advicers.
    Photograpers.
    Researchers.
    Travellers.
11. From the text we can say that ….
    food and drinks are costly
    the park is merely for kids
    the park is worth visiting
    the park is east to reach

Dear Sulaiman,

I feel bad to tell you this, but I need to let you know that that your scout leader application has been denied. We currently need somebody who is strong enough to carry out our program. Upon reviewing your experience, we consider that you would likely be unable to take that responsibility.

Needless to say, I feel very badly about this situation. As your achievement is in science competition, I suggest that you join the science club instead.

Thanks for understanding,

Sukarman

LIVEWORKSHEETS

12. Give a tick (v) to the following answer. From the text above, what is the correct statement above?

Statement	
Sukarman send a letter for Sulaiman	☐
Sulaiman is receiver of the letter	☐
Sukarman is receiver of the letter	☐
Sulaiman is just reader	☐

13. Give a tick (v) to the following answer. From the text above, what is the content of the letter above?

Statement	
Sulaiman is incorrent scout leader	☐
Sulaiman is a good scout leader	☐
Sukarman suggests him to join in science club	☐
Sulaiman have many experience	☐

The Story of Batara Guru

Once upon a time, there was an evil giant. He was called Batara Kala: He liked to kill people. His hair was made form fire. Everybody was frightened of him.

One day, The Chief of Gods, Batara Guru, invited all the gods and goddesses to drink sacred water in paradise. The water was called Tirta Amertasari. Anyone who drank the water, he or she would live forever.

Because Batara Kala was not invited, he secretly flew into Paradise and stole 'some of the water and drank it. Unfortunately the God of Sun, Batara Surya, and the God of Moon, Batara Chandra, knew what he did. They reported what Batara Kala had done to Batara Visnu, the keeper god of universe.

Batara Visnu took his weapon, cakra, and shot it to Batara Kala. It hit him on the neck. Batara Kala's body was separated from head at once but his head was alive. He was very furious with Batara Surya and Batara Chandra. He swore i to take revenge on them.

The giant, Batara Kala, then chased Batara Surya and Batara Chandra. He caught and swallowed them up. Fortunately, Batara Surya and Batara Chandra could escape from Batara Kala's throat because he had no longer his body.

LIVEWORKSHEETS

The Great Wall of China

The Great Wall of China was built over 2.000 years ago, by Qin Shi Huangdi, the first emperor of China during the Qin dynasty.

After subjugating and uniting China from seven Warring States, the emperor connected and extended four old fortification walls along the north of China that originated about 700 B.C. Armies were stationed along the wall as a first line of defense against the invading nomadic tribes north of China known as the Huns. Signal fires from the Wall provided early warning of an attack.

The Great Wall is one of the largest building construction projects ever completed. It stretches the mountains of Northern China, winding north and northwest of Beijing. It is constructed of masonry, rocks and packed- earth. It was over 5000 km long. Its thickness ranged from about 4,5 to 9 meters and was up to 7,5 meters tall.

During the Ming Dynasty, the great Wall was enlarged to 6400 meters and renovated over a 200 years period, with watch towers and cannons added.

The Great Wall can be seen from Earth orbit, but contrary to the legend, is not visible from the moon. Recently, it is elected as one of the new Seven Wonders of the World.

30. Give the tick (v). the simple past passive voice sentences are shown by numbers (You can choose more than one answer)

Statement	
The Great Wall of China was built over 2.000 years ago, by Qin Shi Huangdi.	☐
Armies were stationed along the wall as a first line of defense against the invading nomadic tribes north of China known as the Huns.	☐
The Great Wall is one of the largest building construction projects ever completed,	☐
The Great Wall can be seen from Earth orbit.	☐

31. Give a tick (v) to the correct answer. From the text above, we can know that .... (You can choose more than one answer)

Statement	
The Great Wall of China has never been renovated.	☐
It was added with cannons by Ming Dynasty	☐

Make a phone call, send an e-mail, or a fax	☐

LIVEWORKSHEETS

Rainbows

A rainbow is a meteorological phenomenon that is caused by reflection, refraction and dispersion of light in water droplets resulting in a spectrum of light appearing in the sky. It takes the form of a multicolored circular arc. Rainbows caused by sunlight always appear in the section of sky directly opposite the sun.

Rainbows can be full circles. However, the observer normally sees only an arc formed by illuminated droplets above the ground and centered on a line from the sun to the observer's eye.

In a primary rainbow, the arc shows red on the outer part and violet on the inner side. This rainbow is caused by light being refracted when entering a droplet of water, then reflected inside on the back of the droplet and refracted again when leaving it.

In a double rainbow a second arc is seen outside the primary arc, and has the order of its colors reversed, with red on the inner side of the arc. This is caused by the light being reflected twice on the inside of the droplet before leaving it.

39. What is a rain bow?
    - It is the arc showing red on the outer part and violet on the inner side It is the arc showing violet on the outer part and red on the inner side
    - It is caused by sunlight always appear in the section of sky direct opposite the sun
    - It is a meteorological phenomenon that is caused by reflection, refraction and dispersion of light in water droplets resulting in a spectrum of light appearing in the sky

40. Which statement is not true according to the text?
    - A rainbow can take the form of a multicolored circular arc and also can be full circle
    - In a double rainbow, the primary arc shows red on the outer part and violet on the inner side and the second arc is seen outside the primary arc and has the order of its colors reversed
    - The color-reversed is caused by the light being reflected twice on the inside of the droplet before leaving it
    - In a double rainbow, the primary and the second arcs show the same order of color
