

# EJERCICIO DE ÁLGEBRA - 1

En cada ecuación, indica si el valor de los objetos es correcto o si es incorrecto

|                                                                                                                                                                                        |                                                                                                                                                                                   | ✗ | ✓ |
