

## Reading Ex. > Pollution

Five (5) sentences have been removed from the essay. Choose from the sentences A-H the one which fits each gap (1-5). There are three sentences YOU DO NOT NEED TO USE.

- |  |   |
|--|---|
| <p><b>A</b> <i>It also contributes to climate change, leading to rising temperatures, extreme weather events, and the loss of natural resources.</i></p> <p><b>B</b> <i>Urgent and concerted efforts are needed to reduce pollution levels, promote sustainable practices, and prioritize the well-being of our planet.</i></p> <p><b>C</b> <i>Addressing pollution and implementing effective measures to reduce it is crucial for protecting public health and ensuring a safer environment for everyone.</i></p> <p><b>D</b> <i>Air pollution, for example, is linked to respiratory diseases, cardiovascular problems, and even premature death.</i></p> | <p><b>E</b> <i>The need to reduce pollution levels has led to the creation of new industries and job opportunities.</i></p> <p><b>F</b> <i>The severity of pollution has drawn attention to the need for stricter regulations and the development of cleaner technologies.</i></p> <p><b>G</b> <i>These conditions cause difficulty in breathing, coughing, wheezing, and can have long-term effects on lung function.</i></p> <p><b>H</b> <i>The detrimental effects of pollution on ecosystems, wildlife, and human health have sparked a global movement towards sustainability and green practices.</i></p> |
|--|---|

Pollution is a global issue that poses both advantages and disadvantages to our planet. One advantage of pollution is that it has raised awareness about the importance of environmental conservation. (1) \_\_\_\_ As a result, there has been an increase in environmental regulations, the development of cleaner technologies, and the promotion of renewable energy sources.

Furthermore, pollution has stimulated innovation and technological advancements. (2) \_\_\_\_ Companies are investing in research and development to find innovative solutions to mitigate pollution, leading to the emergence of eco-friendly products and practices. This has not only improved environmental conditions but has also driven economic growth and created a more sustainable future.

However, the disadvantages of pollution are far more significant. The most alarming impact is the degradation of ecosystems and the loss of biodiversity. Pollution disrupts natural habitats, contaminates water bodies, and harms wildlife populations. (3) \_\_\_\_

Moreover, pollution poses severe health risks to humans. (4) \_\_\_\_ Water pollution affects access to clean drinking water, leading to waterborne diseases and a decline in public health. The presence of pollutants in soil and food chains further exacerbates the health hazards.

In conclusion, while pollution has prompted environmental awareness and technological advancements, the disadvantages outweigh the advantages. The degradation of ecosystems, the health risks posed to humans, and the impact on biodiversity are grave concerns. (5) \_\_\_\_ Only through collective action can we mitigate the adverse effects of pollution and secure a healthier and more sustainable future for generations to come.
