

# Student Worksheets

Theme: interactions between components that make up an ecosystem

Name : \_\_\_\_\_

Group :     A    

## Purpose

1. Students can identify biotic and abiotic components
2. Students can identify food chains in ecosystems

## Instruction

Observe the image below!

1. Write down the biotic components and abiotic components that exist in the rice field ecosystem!

No.	Biotic components	Abiotic components

Observe the image below!

Rice Plants

Mushroom

Snake

Mouse

Hawk

2. Based on the picture above, sequence the food chain in the rice field ecosystem and its description. (producer, consumer, decomposer)

# Student Worksheets

Theme: interactions between components that make up an ecosystem

Name : \_\_\_\_\_

Group :     B    

## Purpose

1. Students can identify biotic and abiotic components
2. Students can identify food chains in ecosystems

## Instruction

Observe the image below!

1. Write down the biotic components and abiotic components that exist in river ecosystems!

No.	Biotic components	Abiotic components

Observe the image below!

Algae

Crocodile

Mushroom

Fish

Stork

2. Based on the picture above, sequence the food chain in the river ecosystem and its description. (producer, consumer, decomposer)
