

Simplifying expressions

Simplify the following expressions

$$5x - 3x = \underline{\hspace{2cm}}$$

$$3x + 9 + 4x - 5 = \underline{\hspace{2cm}}$$

$$8x - 3x - 7 = \underline{\hspace{2cm}}$$

$$3x + 7x - 6x + 19 - 8 = \underline{\hspace{2cm}}$$

$$7x - 4x + 29 = \underline{\hspace{2cm}}$$

Place Value / Building numbers

Example: $471,836 = 400,000 + 70,000 + 1,000 + 800 + 30 + 6$

$$40,000 + 5,000 + 700 + 70 + 6$$

$$700,000 + 20,000 + 5,000 + 900 + 50 + 3$$

$$30,000 + 100 + 4$$

Ordering Numbers

Order the following numbers from least to greatest

56 72 201 114 98

321 645 256 782 127

Comparing Decimal

Compare each following pair of decimals using the symbols < (less than), > (greater than) or = (equal to)

1) 43.5 43.12

2) 18.49 19.9

3) 21.75 21.75

4) 4.63 4.3

Area and perimeter

For each figure below find an expression for the perimeter.
