My name is: _____

WORKSHEET

Saturday, May 18th, 2024 FFs2. Unit 13	Teacher's feedbacks

Task 1. Write *two sentences* for each picture using *Comparatives*.

1. (big) The elephant *is bigger than the mouse.*
2. (small) The mouse *is smaller than the elephant.*

3. (fast) The rabbit _____.
4. (slow) The turtle _____.

5. (new) The teddy bear _____.
6. (old) The rabbit _____.

7. (long) The snake _____.
8. (short) The worm _____.

9. (high) The princess _____.
10. (low) The prince _____.

LIVEWORKSHEETS

Task 2. Complete the text using *Comparatives.*

Lions and cheetahs are members of the cat family but they are very different. A lion is about 180 cm long but a cheetah is only 120 cm. So a lion is (1) ..... **(long)** than a cheetah. A lion is about 100 cm tall but a cheetah is only about 70 cm. So a lion is (2) ..... **(tall)** too. Lions are also much (3) ..... **(heavy)** than cheetahs. The lion weighs about 160kg but the cheetah only weighs about 50kg. The lions are (4) ..... **(strong)** and (5) ..... **(dangerous)** than cheetahs. Lions live in "prides" of up to 30 animals, but cheetahs live in (6) ..... **(small)** groups of 2 or 4 animals. Lions live about two years, (7) ..... **(long)** than cheetahs. Cheetahs are much (8) ..... **(fast)** than lions. They can run up 100km an hour. Both animals are beautiful, but I think the cheetah is (9) ..... **(beautiful)** than the lion because of its lovely spots. Both animals are becoming (10) ..... **(rare)** because they are hunted and their homes destroyed.

LIVEWORKSHEETS

Task 3. Read and write *Yes* or *No*.

African animals

I'm reading about African animals on the computer today. Here are six amazing animals.

Cheetahs and leopards are big cats. They are carnivores. Cheetahs hunt during the day and sleep at night. Leopard usually hunt at night and sleep during the day. Cheetahs are faster than leopards. They can run at 100 kilometres an hour. Cheetahs are more social than leopards. They sometimes live in small groups, but leopards are solitary animals.

Hippos and rhinos are big herbivores. During the day, hippos relax in rivers and lakes. They love water! At night, they leave the rivers and lakes and find plants to eat. Rhinos have got a horn and are bigger than hippos. Hippos and rhinos are sometimes aggressive, but hippos are more dangerous to humans than rhinos.

Babbons and chimpanzees are omnivores. Baboons are smaller than chimps. Baboons are social animals and they live in big groups. They've got long noses and a tail. Chimps are social animals too. They've got big ears, but they haven't got tails. Chimps usually sleep in trees. Baboons usually sleep on the ground, sometimes in groups.

I really like chimps. Have you got a favourite animal?

1. Cheetahs and leopards are small cats. .....
2. Cheetahs are faster than leopards. .....
3. Hippos don't love water. .....
4. Rhinos are bigger than hippos. .....
5. Hippos are more dangerous than rhinos. .....
6. Baboons are smaller than chimps. .....
7. Chimps usually sleep on the ground. .....
8. Chimps and baboons are social animals. .....
