

THE RESPIRATORY SYSTEM

Touch  and listen .

INHALATION EXHALATION		NOSE and MOUTH	We breath in air through our <u>nose</u> and <u>mouth</u> .
		TRACHEA or WINDPIPE	Air travels down our <u>trachea</u> or <u>windpipe</u> .
		BRONCHI	The trachea divides in two branches called <u>bronchi</u> .
		LUNGS	Each of the bronchi leads to one of our <u>lungs</u> . In the lungs, oxygen passes to the blood and carbon dioxide passes to the lungs to go out of the body.

Our body needs
OXYGEN.
It gives us energy.

Our body doesn't need
CARBON DIOXIDE.
It's a waste substance.
