

120. Photosynthesis Gp2

Name:

CLASS: 7/

Q1: Choose the correct answer:

- During **photosynthesis**, plants use the products of.....
 - reproduction
 - respiration
 - inhalation
- is a **green pigment** that absorbs the light.
 - Chlorophyll
 - Chloroplast
 - Mitochondria
- TIMSS**: If the plant is kept in **dark for several days**, it will stop growing and eventually die. **Why??**
 - water is not available for the plant
 - Light is not available to be absorbed by chlorophyll
 - Chlorophyll is not available to absorb light
- Which of the following is the **equation of Cellular respiration** [opposite of photosynthesis]?

Extension: Critical thinking:

How **lions** depend on **sun** to get their **food**?
