

## 18 Look at the times. Complete.

Montana

John

California

Kara

- 1 It's eleven fifteen in Montana. What time is it in California? \_\_\_\_\_
- 2 It's ten fifteen. Where am I? \_\_\_\_\_

## 19 Listen and circle.

Time isn't the same around the world. We live on a <sup>1</sup> **globe** / **circle** with different time <sup>2</sup> **days** / **zones**. There are often different <sup>3</sup> **time** / **night** zones in the same country, too, such as in Russia or in the U.S.A. The U.S.A. has four <sup>4</sup> **different** / **big** time zones.

For example, when it's 10:30 a.m. for Kara in California, she's in class. But John in Montana is getting hungry because it's 11:30 a.m. He wants his <sup>5</sup> **breakfast** / **lunch** soon! It's already <sup>6</sup> **lunch** / **dinner** time for Maria in Texas, where it's 12:30 p.m.

## 20 Read and write.

It's one o'clock in London. What time is it in...

- 1 Los Angeles? (-8 hours) \_\_\_\_\_
- 2 Mexico City? (-6 hours) \_\_\_\_\_
- 3 Moscow? (+3 hours) \_\_\_\_\_
- 4 Istanbul? (+2 hours) \_\_\_\_\_
