Determiners Exercises

1. Complete the report with the correct options.

Report by Olga and David

(1).....of us asked 15 students the question "How much do you know about mammals?" (2) .....of us knew that (3) .....baby mammals drink their mother's milk, and (4) .....other student in the class knew that too.

(5) .....students (14 out of 30) also knew that mammals are warm-blooded. (6) Very.....students (2 out of 30) knew that almost all mammals have at least some hair on their bodies, and (7) .....of us knew that before we did our research.

(8) .....students (27 out of 30) knew that mammals give birth to live young, but when we asked if there are any exceptions, there were (9) .....correct answers. No one in the class knew that there are (10) .....mammals (five, in fact) that lay eggs.

2. Complete the text with the words in the box.

each **every** **few** **most** **no** **some**

(1) .....people think that memory is a thing. (2) .....people understand that memory is a process. (3) .....memory is made of several reactions together, including sound, sight, and touch. There is (4) .....single place in the brain where the memory lives. In fact, (5) .....part of a memory is kept in different places in the brain. Only (6) .....people know this and use it to help them memorize important information.
