Think. Read and write *T* (true) or *F* (false). **Mark: ___/15****Fact file: Our Solar System**

There are eight planets in our solar system. They are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune.

All the planets orbit the Sun. The Sun is a star. It is enormous. It gives us heat and light.

The planets take different times to orbit the sun. The planets near the sun take a short time and the distant planets take longer. The Earth takes 365 days to orbit the Sun. This is a year. On Mars, a year is 687 days and on Saturn it's 10,767 days.

The Earth has one moon. Mars has two and Saturn has 62 moons.

- 1 There are nine planets in our solar system. **F**
- 2 Moons orbit the Sun. ____
